

## Umoja Coin Makes Waves as a Single African Currency, Launches Pre-Sale

(February 1, 2023) – The African continent is poised for a major transformation, and cryptocurrencies will play a major role in realizing the vision of ‘One People, One Continent, One Currency’. The same vision lies behind the launch of [Umoja Coin \(UMC\)](#), described as one of the coolest or most promising alt-coins to be launched.

The African people face many financial and money related constraints, and the Umoja Coin wants to free them from these shackles and bring them – both within and outside Africa - under a single umbrella. The possibilities are endless, and a single currency like Umoja holds tremendous potential when used by all of Africa.

Umoja Coin has been launched by a team of co-founders who represent the new future of Africa – they are young, educated and open-minded. The Umoja coin reflects their vision to unite Africa using a single currency that will remove barriers to entry created by traditional banks and financial institutions.

*“UMC represents only a tiny fraction of the solution to breaking the bad spiral, but we believe UMC will ignite the future,”* say the co-founders.

Umoja is a new African currency that can be used across Africa. It will benefit those without a bank account, send and receive payments easily across countries in real time, and get the total value of their money. Thus a farmer in Ethiopia or Sudan will be able to send money to a trader in Congo or Kenya with the same currency and with no transaction costs.

The Umoja Coin is based on the globally popular Polygon blockchain, which allows building scalable and user-friendly solutions. The transaction fees are also low, and security is good. The coin is built with an anti-dumping policy, whereby the co-founders’ wallets will be locked for 24 months until they get full trading access. The coin is thus not a “get rich quick” scheme.

The inclusive nature of Umoja Coin makes it an empowering force. Today, a large number of Africans can't access banking services. Getting a debit or credit card is just a dream. Cross-border transactions are also ridden with difficulties. A single currency that everyone can use is the answer.

### **Umojanomics**

A total of 1.5 billion Umoja Coins (1,500,000,000) will be issued, thus covering the entire predicted population of Africa in 2025. Trading platforms will have a total access to 792,450,000 coins.

### **Presale price:**

1 Umoja Coin = 0.01 USD

### **How to buy:**

Step 1: Get a Wallet: Create a MetaMask account

Step 2: Download or Login to your Meta Mask Wallet and change to Polygon main net

Step 3: Buy Polygon (MATIC) Tokens (debit/credit cards can be used)

Step 4. Connect your Wallet to Umoja Coin

#####

### **About**

Umoja Coin was created and launched by a driven group of people residing in East Africa – the heart of Africa. They envisioned a future united Africa emerging out of unity and closeness, and one of the logical steps had to be a single currency.
